

## Slitter Rewinders and Packaging Lines

In the ever-evolving landscape of the paper industry, Alpha Converting stands out as a innovation in providing turn key solutions. Our cutting-edge slitter rewinders and automated packaging lines are designed to enhance precision and productivity across various material processing needs.

### Advanced Slitter Rewinders

Alpha Converting's slitter rewinders are engineered to deliver exceptional accuracy and reliability. These machines are equipped with advanced tension control and customizable slitting options, making them highly adaptable to both narrow and wide-width materials. This versatility ensures minimal waste and maximized productivity, catering to the diverse demands of the paper industry.

## Automated Packaging Lines

Complementing their slitter rewinders, Alpha Converting's automated packaging lines streamline

the entire process from slitting, rewinding, roll handling, wrapping, labelling, and palletizing. This integration significantly reduces manual labour, enhances speed, and ensures consistency, resulting in a flawless end product.

Directly fed from the end of the printing line, a variety of product variants feed the multi-stream packaging line. Utilizing robotic handling, pallet feeding systems wrapping, and an array of bespoke handling solutions.

## Conclusion

Alpha Converting has a proven track record of providing comprehensive solutions to the paper industry. Our advanced slitter rewinders and automated packaging lines not only reduced operators headcount but also boost productivity, whilst maintaining quality. With a focus on innovation and customer-centric bespoke solutions.
